If I will have the luck to realize at least some of my ideas, it will be a benefaction for the whole mankind. If these hopes of mine come true, the sweetest thought will be that it is the work of a Serbian.

Nikola Tesla

Proclamation

Public Announcement

**to all Serbs in motherland and in diaspora. Join
THE SERBIAN NATIONALheir PROGRAM
UNITED SERBIAN TESLA'S PEOPLE**

Dear compatriots, Serbian Tesla's people, look back, look at the past, to see what our future holds. We will see that our people who are many thousand years old, suffered greatly, lost their freedom, lost t country and its territory, we were destroyed in factories of death, concentration camps, death pits, lost in migrations, persecutions, wars, slavery, epidemics, malnutrition, sanctions and poisoning. But, in all those circumstances, our people fought for our culture, our church, our civilization and gave the world the work of great importance.

Nikola Tesla himself with his brilliant mind, started a worldwide technological and scientific revolution which is unsurpassed in promoting wellbeing of the whole mankind in its every day life. It is difficult to think of a person anywhere in the world who doesn't use Tesla's inventions. Serbs are people of a great spirit, big heart and warm soul, who are friends to every human being, never conquerors in wars, never had slaves.

However, we are now scattered us around the whole world, we don't even know how many of us there are, our connections are broken, we are disappearing, we are becoming not ours and not foreign, our souls are suffering, our Serbian national identity is weaker. We are less like our ancestors, our Serbs, we know about ourselves less, about our roots and our history. Our homeland is being torn apart, it is being given to others, our great people are being called theirs, they are brainwashing us, contaminating our air, water, ground, every day people die of horrible diseases. They dictate their rules for our behaviour, we forget our customs, our tradition, our culture and all of us are becoming less and less Serbian. We resemble others more and it will be like that until we disappear as people, the same way many ancient people did. Serbia and Serbian people are at an ongoing war with the invisible enemy.

There are many negative consequences of the Serbian past. One of them is Serbian diaspora spread around the whole world, that is being assimilated and is melting and disappearing, which is an enormous national loss. They were all born in Serbia, raised, taken care of, with our health care and education, who received all aspects of normal and healthy life, at the prime of their lives, in their with all the beauty and health of young age, they left to serve the foreigners. They created an enormous material and spiritual wealth with their strength and mind for a foreign country, not for mother Serbia. That is the biggest national robbery of Serbia without any compensation.

Even Serbian descendants were in the war against their own people. Janissaries of Serbian origin with an incredible change of national identity were the most cruel opponents of Serbian people. There

are others who with their ideologically poisoned minds still hate and despise their Serbian origin. That is the tragedy of Serbian people. There are still single mothers who ask their Docotors to write a death certificate for them so they can send it to their lost children hoping they would come and see them before they die. Can we allow for us to disappear that way too, not allowing our social sickness to heal! We have to take out the knife from our own heart, stabbed with our own Serbian hand.

Let's stop our disappearing, get our act together, get closer, strengthen our spirit, our national conscience and our national identity so we can provide the future to the new generations of Serbs, let us preserve Serbian Tesla's people, people of great spirit.

To accomplish that it is necessary that the Serbian people come up with a unique national program for all Serbs of the world regardless of all differences, so we can bring light to the present, bad situation. We should establish what the problems of Serbian people are, identify causes of those problems and suggest ways and means of eliminating them. We should clearly state what the characteristics of Serbian people are, that makes us Serbs, what constitutes our national conscience, Serbian national identities, define what it is that makes Serbian national integrity and our future as a nation. We have to be aware of ourselves so we don't wander through life aimlessly.

**That document is called THE SERBIAN NATIONAL PROGRAM
UNITED SERBIAN TESLA'S PEOPLE**

We are calling all Serbs in diaspora and in homeland who wish and have an idea, suggestion or vision about bringing SNP USTP to life.

The work should be divided as following:

A/ Identify all problems of Serbian people in 21. century, regardless of their depth or importance;

B/ Identify all causes of problems of Serbian people;

C/ Suggest the means and ways of removing those problems, diminishing of each and every cause of those problems;

D/ Specifically point out the basic fundamentals of Serbian national conscience and Serbian national identity because they precede biological and spiritual existence of Serbian people in all circumstances and at all times.

Priorities A/, B/ and C/ can be written by more or less anyone, because they are part of our time, which make our life. Each person knows best what their problems are, what the causes of those problems are and how they can be eliminated.

Priorities D/ are the basis of our social superstructure, our SUPER EGO, that we acquired in our families, at school, in our social life national historical collective, cultural heritage (language, religion, family and social behaviours, customs, tradition, sense of individual and collective perspective, or in general, everything that makes us distinctive as Serbian people and individually Serbian).

„The Serbian national program united Serbian Tesla's people” will be collective work and possession of every Serb and no one can, based on it benefit personally or claim any rights, as no one can claim the air we breathe. With that, SNP USTP will give us a clear perspective for Serbian people and for personal perspective as part of Serbian national conscience.

It will not bother us at all to live harmoniously, to be one with our surrounding regardless of its quality and with that find strength in Serbian national conscience and Serbian national identities. We will preserve all that and firmly stay the way and what we are: Serbs. That will give us the strength and pride in belonging to Serbian people, we will not live with the feeling of ambivalence, which that can lead to religious and national conversion, from ideological deviance, subserving, feeling of shame for being Serbian and not some other ethnicity that we respect as people with good qualities. That will help us to surpass those people we admire or at least to be equal with them. We will be a good example for others for what they want to accomplish the same way some countries are for others.

This theme is not final, with time we will add new priorities, ideas, facts we learned, and generally speaking SNP USTP be a dynamic category rather than a religious dogma.

I strongly believe that we will all be happy to be Serbian. That is why I am calling every Serb wherever you might be, Serbs in diaspora and motherland, all Serbian organisations, especially Serbian youth to join us and actively participate in bringing this Serbian National Program to life, without inferiority complex, without discouragement or self doubt.

Belgrade, 18. 08. 2018.

Ph.D. Dobrosav Nikodinović, Serbia
